

MURTHUJAVALI PINJARI

Python Full Stack Developer | Frappe / ERPNext Specialist

Hyderabad, India | +91 9100850087 | luckymurthu@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Python Full Stack Developer with hands-on production experience building and deploying systems on Django and the Frappe/ERPNext framework, including a live Hospital Management System on Frappe Cloud. Leads a 4-person engineering team at Brilliant Technologies, owning code review and mentoring while delivering backend work in REST APIs, MySQL, and Docker. Also delivers client-facing WordPress/CMS engagements end-to-end. National finalist, Smart India Hackathon 2023 (2nd Prize). Seeking a Python / Frappe-ERPNext Developer role to grow into broader technical ownership.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Backend: Django, Frappe Framework, REST APIs, OOP

ERP / Frappe: ERPNext, Custom DocTypes, Frappe Cloud, Server & Client Scripts

Frontend: HTML5, CSS3, JavaScript, Bootstrap

Databases: MySQL, MariaDB

DevOps & Cloud: Docker, Git/GitHub, Linux, AWS (basic deployment), Frappe Cloud

Testing: Unit Testing, Manual QA, PyTest (working knowledge)

Architecture & Practices: Role-Based Access Control, API Design, System Design fundamentals, Agile/Scrum

CMS / Tools: WordPress, WooCommerce, Beaver Builder, SEO Optimization

PROFESSIONAL EXPERIENCE

Python Full Stack Developer (Team Lead, 4-person team)

Feb 2025 – Present

Brilliant Technologies, Hyderabad

- Lead a 4-person engineering team delivering enterprise web applications on Python, Django, Frappe Framework, and ERPNext, owning sprint planning, code review, and release sign-off.
- Architected and shipped a Hospital Management System on Frappe Cloud covering patient registration, appointment scheduling, billing, pharmacy, and lab reporting — live in production, currently serving a clinic staff of 45+ users.
- Built custom Frappe DocTypes, server/client scripts, and REST API integrations to automate manual business workflows, cutting repetitive admin tasks across departments.
- Introduced Docker-based environment setup for the team, reducing new developer onboarding and local setup time.
- Conduct code reviews and mentor 3 junior developers on Python/Django best practices and Frappe architecture patterns.

WordPress Integrator

Feb 2025 – May 2025

Vsplash Techlabs Private Limited, Hyderabad

- Integrated and customized WordPress themes, plugins, and third-party APIs across multiple client websites, coordinating directly with designers and backend developers.
- Optimized site performance and SEO through caching, image compression, and Beaver Builder layout tuning, improving page load speed and mobile responsiveness.
- Owned post-launch maintenance and client technical support, resolving production issues and reducing recurring support tickets.

Python Full Stack Developer Intern

2024

Durga Software Solutions, Hyderabad

- Built full-stack web features end-to-end using Django (backend) and HTML/CSS/JavaScript/Bootstrap (frontend), with SQL-driven CRUD operations.

- Coordinated as Intern Student Coordinator across EduSkills programs, onboarding and technically guiding 20+ interns over the engagement.
- Produced programming tutorials for the YouTube channel 'Syntax Solver,' translating internal training material into public-facing educational content.

KEY PROJECTS

Hospital Management System — ERPNext & Frappe (Production)

- Situation: Client needed a unified system to replace manual patient, billing, and pharmacy record-keeping.
- Task: Architect and build the core modules within Frappe/ERPNext and deploy for live clinical use.
- Action: Designed custom DocTypes for patient records, appointments, and billing; built REST API integrations; configured role-based access for doctors, reception, and pharmacy staff; deployed on Frappe Cloud.
- Result: System is in active production use by 45+ clinic staff, handling end-to-end patient flow from registration through billing and pharmacy dispensing.

Custom Frappe Workflow Application

- Situation: Client business workflows were managed manually across spreadsheets and email.
- Task: Replace manual coordination with a structured, auditable digital workflow.
- Action: Built custom DocTypes, server/client scripts, and REST API endpoints inside Frappe to model and enforce the workflow.
- Result: Delivered a working internal tool that gave the client a single source of truth and an audit trail for the workflow.

Student Management System — Django, MySQL

- Situation: Academic project to manage student records, attendance, and grades.
- Task: Build a secure, role-based admin system with reporting.
- Action: Implemented Django backend with MySQL, role-based authentication, and a dynamic reporting dashboard.
- Result: Delivered a fully functional system with automated reports and a responsive admin UI.

LEADERSHIP & MENTORSHIP

- Lead a 4-person development team at Brilliant Technologies — own architecture decisions, sprint planning, and final code review sign-off before release.
- Mentor 3 junior developers on Python/Django and Frappe conventions; review pull requests for correctness, security, and maintainability.
- Coordinated EduSkills internship cohorts for 2 years, onboarding and technically guiding 20+ interns.
- Communicate directly with clients to translate business requirements into technical specifications for the Frappe/WordPress engagements.

ACHIEVEMENTS

- 2nd Prize, Smart India Hackathon (SIH) 2023 — National-level Government of India initiative; built a Frappe/ERPNext-based solution as part of a team, ranking 2nd nationally against 1000+ competing teams.

EDUCATION

B.Tech, Electronics & Communication Engineering

2024

Santhiram Engineering College, Andhra Pradesh — CGPA: 8.0/10

Intermediate (MPC)

2020

KNR Memorial Junior College — 74%

CERTIFICATIONS

- Frappe & ERPNext Developer — Brilliant Technologies (2025)
- Software Developer Certification — Institute of Software Excellence (2025)

- WordPress & WooCommerce Developer — Vsplash Techlabs Pvt. Ltd. (2025)
- Python Full Stack Developer — Durga Software Solutions (2024)
- Web Development Certification — American Indian Foundation / S&P Global (2023)
- SQL Fundamentals — HackerRank (2022)
