PROFESSIONAL SUMMARY

ERPNext/Frappe Developer with hands-on experience customizing Frappe Framework and ERPNext v15/v16, including production business workflows across Healthcare, CRM, and HRMS. Builds custom DocTypes, Client/Server Scripts, Frappe apps, role-based permissions, REST API integrations, webhooks, Query Reports, dashboards, and Jinja print formats. Delivered a Hospital Management System used by 45+ clinic staff, maintains a custom CRM, developed telephony integration, and automated attendance/location and payroll rules. Leads a 4-person engineering team, supports code reviews and releases, and translates client needs into technical solutions. Smart India Hackathon 2023 national finalist / 2nd Prize. Seeking an ERPNext/Frappe Software Engineer role.

CORE FRAPPE / ERPNEXT SKILLS

Framework & Customization: Frappe Framework v15/v16, ERPNext v15/v16, custom apps, DocTypes, hooks, Client Scripts, Server Scripts, Workspaces, workflows, role/user permissions, print formats.

ERP Modules: CRM, Healthcare, HRMS, Employee, Attendance, Shift, Leave, Payroll, Salary Slip, Lead, Opportunity, Quotation, Sales Order, Sales Invoice, Payment Entry, Service Contracts, Tickets, Projects.

Reporting & Data: Query Reports, SQL reporting, dashboards, filtered reports, Jinja templates, data import/mapping, duplicate detection, validation, reconciliation, MariaDB/MySQL.

Integrations: REST APIs, webhooks, third-party APIs, Tata Smartflo telephony, WhatsApp/SMS platform exposure, GPS/geolocation, Frappe Realtime/WebSockets, Flutter-to-Frappe API project work.

Development & Operations: Python, JavaScript, SQL, Django, OOP, Git/GitHub, Linux, Docker, Frappe Bench, Frappe Cloud, production debugging, migrations, basic AWS deployment.

Additional: HTML5, CSS3, Bootstrap, WordPress/WooCommerce, Flutter/Dart project exposure, Firebase Cloud Messaging, eSSL/ZKTeco biometric devices via Python/pyzk.

PROFESSIONAL EXPERIENCE

Python Full Stack Developer — Team Lead, ERPNext/Frappe | Brilliant Technologies, Hyderabad | Sep 2025–Present

- Lead a 4-person engineering team delivering Frappe/ERPNext systems; contribute to sprint planning, architecture decisions, code reviews, release sign-off, and client requirement analysis.
- Architected and shipped a production Hospital Management System on Frappe Cloud covering patient registration, appointments, billing, pharmacy, and lab reporting for 45+ clinic staff.
- Built and maintain BCRM, a custom Frappe CRM supporting Lead → Opportunity → Quotation → Sales Order → Invoice → Payment, plus service contracts, tickets, and projects.
- Developed a Tata Smartflo telephony integration app with click-to-call, webhook-based call logging, live call timer, and Frappe Realtime activity timeline refresh.
- Implemented employee check-in/out and location tracking with GPS logs, visit/travel sequencing, office-radius validation, duplicate-log prevention, and eSSL/ZKTeco integration using Python/pyzk.
- Customized HRMS/payroll logic for shift timing, late entry and grace periods, half-day/working-hour conditions, Sandwich Rule, attendance dashboards, and attendance-based payroll calculations.
- Worked on cross-system CRM import/reconciliation: customer/product mapping, duplicate checks, missing-link diagnosis, API pagination, and authentication/error troubleshooting; maintained VCRM as read-only.
- Implemented REST API and Client/Server Script automation, assisted with role-based permission troubleshooting, and set up Docker-based development environments; mentor 3 junior developers.

ADDITIONAL PROFESSIONAL EXPERIENCE

WordPress Integrator | Vsplash Techlabs Private Limited, Hyderabad | Feb 2025–May 2025

- Integrated and customized WordPress themes, plugins, and third-party APIs across client websites; improved performance and SEO through caching, image compression, and Beaver Builder tuning.
- Handled post-launch maintenance and client support, troubleshooting production issues and recurring website problems.

Python Full Stack Developer Intern | Durga Software Solutions, India | 2024

- Built full-stack features with Django, HTML, CSS, JavaScript, Bootstrap, and SQL-driven CRUD operations; coordinated EduSkills intern cohorts and onboarding for 20+ interns.
- Created programming tutorials for Syntax Solver, translating technical learning material into educational content.

SELECTED ERPNEXT / FRAPPE PROJECTS

Hospital Management System — Production | ERPNext / Frappe

- Designed custom DocTypes for patient records, appointments, and billing; configured role-based access for reception, doctors, lab, and pharmacy staff.
- Supports patient flow from registration and appointments through billing, lab/nutrition workflows, pharmacy dispensing, and ongoing production support.

BCRM — Custom Frappe CRM

- Built and maintain sales pipeline, invoice/payment flows, service contracts, tickets, projects, customer dashboards, reports, activity timelines, and workflow automation.
- Worked on BCRM–VCRM data import and validation, customer/product relationship matching, duplicate detection, and missing-link diagnostics while keeping VCRM read-only.

BT Smartflo — Telephony Integration App

- Integrated Tata Smartflo with BCRM for agent management, click-to-call, webhook-based call logs, call activity tracking, live timer, and auto-refreshing timeline.
- Call disposition management, agent analytics, and supervisor live monitoring are roadmap items, not represented as completed features.

Employee Attendance & Geolocation Tracking

- Built location-log tracking for GPS coordinates, address, activity type, and check-in → office/visit → travel → call → lunch → check-out, including office-radius checks and duplicate-log prevention.
- Integrated eSSL/ZKTeco devices through Python/pyzk; mapped device IDs to employees and distinguished biometric from mobile check-ins.
- Customized HRMS shift, late-entry/grace-period, working-hours, Sandwich Rule, and payroll calculations; developed monthly attendance reports and map links using OpenStreetMap/Nominatim.

Flutter Field Tracker — Mobile Integration Project

- Worked on Firebase configuration/notifications, Flutter–Frappe API integration, GPS/location permissions, device information, and Android app version/update handling. Described as project work; production rollout not claimed.

ADDITIONAL TECHNICAL CONTRIBUTIONS

- HRMS: Attendance score and working-hours fields, Sales vs Non-Sales check-in/out rules, role-level tracking settings, attendance-based incentive logic, and payroll troubleshooting.
- CRM Visit Logs: Employee assignment, login/logout timestamps, duration, GPS/address fields, map URLs, and visit result/status automation.
- ERP domain exposure: Item-wise GST configuration and CGST/SGST vs IGST business rules; pharma and pipe-manufacturing ERP blueprint/domain design exposure. Only verified implementation details should be discussed as delivered work.

LEADERSHIP, ACHIEVEMENT & EDUCATION

- Leadership: Lead a 4-person development team; mentor 3 junior developers in Python/Frappe conventions; review code for correctness, security, and maintainability.
- Achievement: 2nd Prize, Smart India Hackathon (SIH) 2023 — national-level initiative; contributed to a Frappe/ERPNext-based solution as part of a team.

B.Tech, Electronics & Communication Engineering — Santhiram Engineering College, Andhra Pradesh | CGPA 8.0/10 (2024)

Intermediate (MPC) — KNR Memorial Junior College | 74% (2020)

CERTIFICATIONS

Frappe & ERPNext Developer — Brilliant Technologies (2025) • Software Developer Certification — Institute of Software Excellence (2025)

WordPress & WooCommerce Developer — Vsplash Techlabs Pvt. Ltd. (2025) • Python Full Stack Developer — Durga Software Solutions (2024)

Web Development Certification - AIF / S&P Global (2023) | SQL Fundamentals - HackerRank (2022)
